

AMENDMENTS TO THE SPECIFICATION

In the Specification:

Please add a paragraph beginning after page 1, line 31, which states the following:

In each of the above devices, a patient receives a treatment over a number of pulses or breaths. This might mean that a single treatment takes several minutes to deliver because of the amount of the drug which is to be delivered, and the nature of the device which is delivering the drug. Thus, in this specification, where a treatment is referred to, this refers to the delivery of a single dose of a drug over a number of breaths. In addition, any references to the dose refer to the quantity of a drug delivered to a patient during a treatment. In a course of treatments, a patient might be required to receive the dose of the drug twice a day, in which case the patient is required to carry out two treatments each day.
